HYACINTHS

Hyacinths are easy to grow either as bedding or potting plants, and their fragrance, attractive colors and lasting qualities have established their universal popularity.

Large Bulbs, 30c each; \$3.00 doz; \$21.00 per 100
City of Haarlem. Yellow.
Grand Maitre. Deep porcelain blue.
Pink Pearl. Rosy pink.
L'Innocence. The best of the white.
Queen of the Blues. Light blue with silvery shade.
Queen of the Pinks. Bright rosy pink.

MUSCARI (Grape Hyacinth)

Delightful dwarf blue-flowering bulb, useful as a ground cover, especially with early pink or yellow flowering plants. Used in broad drifts they make an unforgettable picture, the little grape-like clusters of flowers a beautiful shade of blue, 6 inches.

Muscari (Grape Hyacinth). Blue or white. 75c doz.; \$5.00 per 100.

CROCUS (Giant Spring Flowering Type)

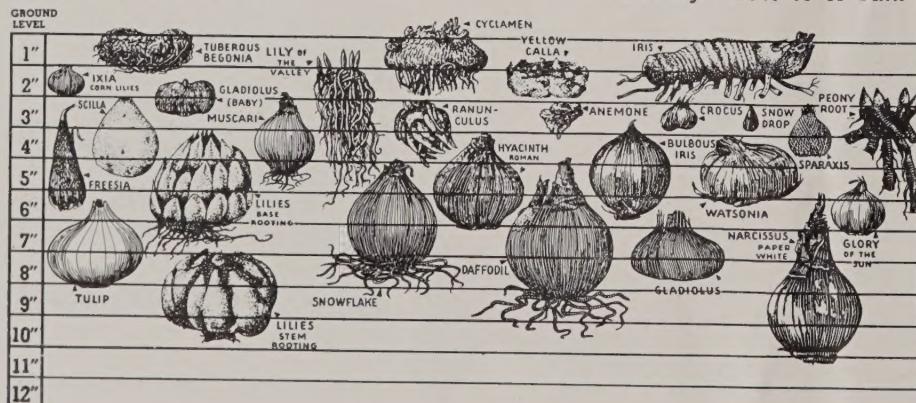

No one who is looking forward each year to finding "the first flower of spring" should be without a crocus patch in the garden. Massed in beds or scattered throughout the lawn, crocus should always be planted in groups for cheeriest effect.

Blue, purple, yellow, white and striped. 50c doz.; \$3.75 per 100.

Tigridium (Tiger Lily). Orange with black spots. 50c each; \$5.00 doz.

Delivery: Nov. 15 to Jan. 15

SCILLA (Wood Hyacinth)

Graceful spikes of bell shaped flowers. They do well in shade or sun for naturalizing.

Scilla (Wood Hyacinth). Blue, rose or white. \$1.00 doz.; \$7.00 per 100.

CULTURAL DIRECTIONS

TULIPS

Plant Tulips 6 inches deep and 8 inches apart in rich, deep, well drained soil. After the bulbs die down, lift the bulbs, dry them in a cool, airy place, dust with sulphur, and store until October when they should be replanted. Do not plant Tulips in small, square blocks or thin lines! Very pleasing effects can be obtained by planting them in irregularly shaped drifts of a dozen or more bulbs of one variety.

DAFFODILS

Although Daffodils thrive in most soils, a good garden soil with ample drainage is preferred. The flowers need a fair amount of sun, especially in the morning.

HYACINTHS

Hyacinths thrive in a rich, well drained sandy loam, planted about 5 inches deep in a sunny location or partially shaded location. Leave in the ground for three years; then remove bulbs and replant them in October or November.

DUTCH IRIS

Plant in sun or partial shade, 3 to 4 inches deep and from 4 to 6 inches apart. If planted in a sunny location they may be left in the ground for years in succession.

CROCUS

Plant in fall and replant every 2 or 3 years, 3 or 4 inches deep in good soil in sun or filtered shade, about 3 inches apart, best in groups.

LILIES

Lilies do best in open, porous soil, require perfect drainage and shade from hot sun near their roots. It is therefore best to plant them in perennial border or among low growing shrubs. Manure should never be used, and no fertilizer should contact the bulb.

MUSCARI

Hardy everywhere. No special care required. Plant 3 or 4 inches deep in shade or sun.

SCILLA

They do well in shade or sun. Plant in Sept. 5 inches deep in rich soil.

WARNING: Never use manures with bulbs for they cause the bulb to rot. Bone meal or balanced commercial fertilizer with peat moss is best for bulbs. All bulbs need good drainage.
